

A call to action:

Striving towards inclusion in academic biology

Beyond information: Walking the path of truth, reconciliation, and liberation to make academic biology more inclusive

Desmond Tutu reminds us that our “humanity is caught up and is inextricably bound up in others.” In this seminar, we will build on the previous seminars in this series to examine the work of social justice using the lens of our interconnectedness and interdependence. Together, we will consider why we must strive to move beyond ally-ship and statements of solidarity toward truth, reconciliation, and liberation. Specifically, how can we take what we have learned in this seminar series and move towards action.

An initiative sponsored by the Society for the Advancement of Biology Education Research (SABER) focused on promoting awareness, understanding and commitment to change academic biology environments to be more inclusive. We are excited that speakers will be compensated for their time and this event is co-sponsored by Arizona State University's HHMI Inclusive Excellence Project, SEISMIC Collaboration, Community College BIO INSITES, and the ASU RISE Center.

Seminar

Date: Thursday, May 13

Time: 9 AM (PT) // 10 AM (MT) // 11 AM (CT) // 12 PM (ET)

Location: Zoom
