

Biology Education Research Postdoctoral Fellowship Program

UNIVERSITY OF GEORGIA

Scientists Engaged in Education Research

This program is supported by the National
Science Foundation Grant No. 2328692.

The Scientists Engaged in Education Research (SEER) Center at the University of Georgia is eager to welcome its inaugural cohort of **Four (4) Postdoctoral Fellows in Biology Education Research!**

- Each Fellow will be **co-mentored** by experts in biology education and relevant social science fields (e.g., cognitive psychology, educational psychology, higher education, measurement).
- Each Fellow will be appointed for **two (2) years** to start in August 2024 with \$70,000 annual salary and benefits (retirement, healthcare) with the option to continue pending availability of funds.
- Fellows will **choose a defined cross-disciplinary research project** to carry out to advance their knowledge and skills AND be supported in developing their own **independent research project**. Research project options are posted [here](#).
- Research training will be complemented by cohort-based and individualized **professional development**, including options to gain teaching and mentoring experience, complete diversity and inclusion certification, interact with a national group of experts, write papers and proposals, network at national/international meetings, explore career options, and search and apply for jobs.
